

Amendments to the Specification

Applicants are filing herewith a substitute specification shown in incorporating the insertion of the Cross-Reference to Related Applications section, as added in the First Preliminary Amendment filed August 11, 2006. The substitute specification also inserts the appropriate paragraph numbers and section headings through the specification, and adds part numerals to the refrigerator, compressor, temperature sensor, and controller as reference throughout the specification. A marked-up copy of the substitute specification is provided for the Examiner's convenience.
